

UPGRADE 002

Control exchange to current TIA series

Your advantages

- The TIA control keeps the line availability permanently at highest level
- Breakdowns are noticeably reduced
- TIA is established as the latest programming standard
- All spare parts can be procured cost-efficiently, quickly and for years to come
- Digitalization connection e.g. remote control and improved diagnostic tools
- Conversion can be realized in approx. 2-3 days
- Suitable for all machine types
